Project Name	Project – Inventory Management System For Retailers
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help farmers better understand about fertilizers usage.

Creating an effective solution requires understanding the true problem and the person who is experiencing it in their farms. The exercise of creating the map helps farmers/user consider things from the user's perspective along with his or her goals and challenges and necessities.
